

## Mount Olive Soccer Club Full Sided Field

For full-sided play, the club usually opts for a field that is at least 180' wide and at least 300' long with 24' goals. If you plan to run 2 small-sided travel fields within a full-sided field, use 210' for the width and 330' for the length. This will give a 30' buffer between the smaller fields.
